SPECIAL CONTRACT REQUIREMENTS

Scope of Work
EDI Replenishment

This contract will be using the EDI Replenishment (EDI Replen) process, either via Electronic Data Interchange (EDI) or WEB Electronic Commerce (EC). The procedures for utilizing either option are described below.

EDI Replenishment (EDI Replen)

Both the Contractor and the Government shall agree to use Electronic Data Interchange (EDI), or WEB EC. In employing this process, the contractor will need to incorporate predetermined communication filters to allow electronic transmission using ANSI X.12 standards, or employ a Web browser in order to pick up contractual documents at www.tank-edi.com. The ANSI X.12 Standards include but are not limited to, transaction sets for purchase orders, delivery orders, invoices, and other contractual business related information between the government and the contractor. These transaction sets are also available in WEB EC as text-based documents.

Both the Contractor and the Government shall agree to use either EDI, via the ANSI X.12 standards through a DOD Certified Value Added Network (VAN) (Option 1 below), or WEB EC (Option 2 below). Direct coordination between the Contractor and the Government will be required prior to the use of EDI. To allow the EDI process to happen, both entities must sign a Trading Partner Agreement. The Trading Partner Agreement is located in the Implementation Guide, found on the Internet at www.tank-edi.com.

Deliveries made on EDI Replen Orders will be based on a mutually agreed upon delivery time for the initial delivery for each order. The delivery time(s) are located in Section F of this solicitation (or as specified elsewhere). Delivery orders issued under this category will have a delivery date (or dates if incremental shipments are desired) stated within the delivery order. The initial delivery date shown on each delivery order will not be earlier than the mutually agreed upon initial delivery time.

OPTION 1 - ELECTRONIC DATA INTERCHANGE (EDI)

In employing this process, the Contractor will need to incorporate predetermined communication filters to allow electronic transmission using ANSI X.12 standards. The ANSI X12 Standards include, but are not limited to, Transaction Sets for purchase orders, delivery orders, invoices, and other contractual business-related information between the Government and the Contractor. The Government anticipates using, at a minimum, the following ANSI X.12 Transaction Data Sets. The Transaction Set number and its function are listed below.

<u>Function</u>	<u>Transaction Set</u>
Invoice	810
Delivery/Purchase Order	850
Purchase Order Agreement	855
Functional Acknowledgement	997

The originator pays transmission charges for the VAN, whether it is the Government or the Contractor. The Government currently uses AT & T Easylink or Harbinger Corporation. Therefore, the contractor must be able to interconnect with Easylink or Harbinger Corporation. A list of VANs can be found on the San Antonio ECRC page: www.saecrc.org/van.

The Contractor and the Government will run a test within 30 days from contract award to ensure both parties are able to transmit and receive the Transaction Set data. Once testing is successfully completed, the contractor will be certified capable of conducting EDI. The Contractor must then be capable of receiving and processing EDI orders within 45 days after contract award. The Government may waive testing if it deems it to be unnecessary.

OPTION 2 - WEB ELECTRONIC COMMERCE (EC)

This contract may also be conducted using an Internet-based application called WEB EC. In employing this process, the contractor must have, as a minimum, an Internet Service Provider (ISP), a 32 Bit Platform like Windows 95, Netscape 3.01 or Explorer 3.02, and a 28,800 Baud Modem in order to receive and access contractual documents at www.tank-edi.com. For optimal usage, it is recommended that the contractor have an Internet Service Provider, Windows 95, Netscape 3.01, or Explorer 3.02 and a 56,000+ Baud Modem in order to receive and access contractual documents at www.tank-edi.com.

NOTE! AOL users must be using v4.0 or higher to use WEB EC.

The Transaction Sets listed below will be available to the contractor in a Text Based Format, which the contractor may download and/or respond to on-line:

The Contractor and the Government will run a test within 30 days from contract award to ensure both parties are able to transmit and receive the Transaction Set data. Once testing is successfully completed, the contractor will be certified capable of conducting WEB EC. The Contractor must then be capable of receiving and processing WEB EC orders within 45 days after contract award. The Government may waive testing if it deems it to be unnecessary.

As part of the WEB EC application, the contractor will also receive on-line a Bar Code that can be utilized for shipment against the applicable Delivery Order. The contractor may submit its invoice to DFAS via it's Web Invoicing System (WinS) as part of its on-line response. Additionally, in certain circumstances, an on-line electronic DD Form 250 may be available as well.

BAR-CODE LABELING OF INDIVIDUAL SHIPMENTS

The contractor shall apply bar-coded labels to every shipment made under this contract. A bar-code label is required for each exterior container or palletized load that contains a single item, each unit pack and intermediate container used in addition to the exterior container and/or each item being shipped loose or unpacked/unpacked, as allowed by the contract or order. Bar-codings on all containers shall be in accordance with MIL STD 129N dated 15 May 97 and ANSI AIM-BC1-1995, dated 16 Aug 95. MIL STD 129N and ANSI AIM BC1-1995 specify bar code density, dimensions, technical structure, symbol separation and placement. MIL HDBK-129 has information and illustrations you may refer to for guidance on bar-code markings. If you use multiple bar-code labels rather than a single large label to comply with the requirements of this contract, you must apply them adjacent to each other, either side by side or stacked vertically. BAR CODES CAN BE SENT TO YOU VIA WEB EC.
